STOCK SPOTLIGHT

Health Care Sector

Last month we highlighted the declining weight of biotech stocks within the BUZZ Index as a trend that we were paying close attention to. After an eventful first 9 months of 2017 in which the iShares Nasdaq Biotechnology ETF (NASDAQ: IBB) broke out above its year-long trading range, biotech stocks pulled back, along with investor sentiment, to end the year. So far in 2018, it appears sentiment is rebounding in the sector. This month, the weight of health care stocks in the BUZZ Index jumped 5.5%, completely reversing the drop from last month. Leading the way are several of the larger cap names such as Celgene (NASDAQ: CELG, +1% weight in January) and Abbvie (NYSE: ABBV, +1.87% weight in January), along with a few interesting new additions to the Index in Vertex Pharmaceuticals (NASDAQ: VRTX) and Juno Therapeutics (NASDAQ: JUNO). The strong sentiment move to start the year bodes well for the sector, and it's looking increasingly likely that biotech is poised to resume its bullish run in 2018.

First Solar

Making its first ever appearance in the BUZZ Index, First Solar (NASDAQ: FSLR), the largest solar company in the US, is certainly not a new name to many investors. During the craze in solar stocks in 2007, FSLR increased more than 1,000%, reaching a high of over \$300 in 2008. The Financial Crisis hit the solar sector particularly hard, sending the group into a bear market for the next several years. After bottoming out near \$13 in 2012, FSLR has been consolidating for the past several years, previously trying twice but unable to break above \$80. Since April 2017, FSLR has been on another bullish run, rising from \$25 up to \$75, and is once again attempting to break out to new multi-year highs. This time, the rally has been accompanied by increasing investor sentiment, which is now at levels high enough to push FSLR into the BUZZ Index. We're interested in seeing if this signal could foretell a long awaited breakout in the sector, marking 2018 as a year to watch in solar stocks.

The **BUZZ NextGen AI US Sentiment Leaders Index** identifies the 75 most bullish U.S. stocks based on investment insights derived from the vast content generated across online platforms.

Millions of unique stock-specific data points aggregated from online sources including social media, news articles and blog posts are processed on a monthly basis.

The data is filtered through an analytics model which utilizes Natural Language Processing Algorithms and Artificial Intelligence applications.

HOW IT WORKS:

1. Where's the BUZZ?

First, from a defined investment universe of U.S. stocks, the BUZZ Index targets the most mentioned stocks discussed across online platforms. The more active the conversation, the greater the reliability of the BUZZ.

2. What's the BUZZ?

The BUZZ Index looks at what the online community is saying about these most-mentioned stocks and whether the BUZZ is positive, negative or neutral on a collective basis.

3. Who is creating the BUZZ?

The BUZZ Index pinpoints influencers within the online community and identifies whose tweets and posts are most likely to impact collective opinion. It also identifies and scores which members of the online community have historically been the most successful in their forecasting accuracy.
